You don't have to leave St. Clair County to earn a four-year degree. St. Clair County Community College offers the chance to complete a bachelor's or master's degree through our University Center in Port Huron.

Start the first two years of your education at SC4, then transfer to a bachelor's degree program without transferring to a new campus.

On our Port Huron campus, students have access to 10 degrees in numerous fields through our university partners:

- Central Michigan University
- Ferris State University
- Saginaw Valley State University
- Siena Heights University
- University of Michigan-Flint
- Walsh College
- Wayne State University

Students can earn bachelor's degrees in applied science, business administration, criminal justice, elementary education, multi-disciplinary studies, psychology and social work.

Walsh College is our newest partner, offering a bachelor of accountancy degree and bachelor of business administration degree in management. Walsh also offers classes in Port Huron toward an honors fast-track master of business administration degree.

Through our partnership with Central Michigan University, students can earn a master of arts in instructional education on our campus.

Our partnership with Kettering University allows members of our community to complete master of science degrees online in engineering disciplines, information technology, manufacturing management, manufacturing operations and operations management.

We brought these partnerships to our Port Huron campus because we recognize the busy lives students lead. We know many of our community residents aren't able to go away to a university or to drive several hours each day to a university campus to earn a bachelor's or master's degree.

Many students have families and work while going to school. So SC4 and our university partners offer
classes during evenings and weekends to accommodate those busy schedules.

The SC4 University Center is in the college's Citizens First Michigan Technical Education Center at the corner of Glenwood Avenue and Erie Street. The classes are held in classrooms on the SC4 campus and taught online.

Most important, the University Center's convenience is backed up with quality instruction. The degree programs are designed so students come to SC4 for two years before seamlessly transferring to one of our university partners. Get your start with classes taught by SC4's faculty and then take university classes taught by faculty from those institutions.

With SC4 and its University Center partners together on one campus, we help make the cost and time to earn higher education degrees more manageable.

And, of course, we also can prepare students at SC4 to transfer to a four-year university campus. SC4's classes transfer to universities across the state and country, and our academic advisors help ensure students take the right classes to meet degree and career goals.

Our students can pursue degrees in fields designed to meet our community's needs. These opportunities translate into success. Countless students tell us the University Center convenience made it possible to earn degrees that previously seemed unattainable.

We are proud to offer these partnerships on our campus. I encourage you to explore "going away" to SC4.
