Capstone Project Fair
Saturday, March 21 from 10 a.m. to 1 p.m.
Walsh College - Troy campus

Please join the BIT faculty and their students this Saturday, March 21 from 10 a.m. to 1 p.m. at the Troy campus for the Graduate Student Information Technology Capstone Fair.

What is the Graduate Student Information Technology Capstone Fair?
The Capstone project is a project presentation by graduate students in the MSIA (Master of Science in Information Assurance) and MSIS (Master of Science in Information Systems) programs. The goal of this project is to demonstrate each student’s project management skills and abilities as well as knowledge of the program curriculum. Essentially, students are showcasing a project and demonstrating what they’ve learned throughout their program, spanning all areas of the MSIA or MSIS curriculum. This project is required for the BIT 599 course and for successful completion of this graduate program.

Each student has a project display table and will be set up in room 128 from 10 a.m. to 1 p.m. this Saturday.

What is a Capstone project?
Projects vary by student, as each student selects their own project. In this year’s Capstone Fair, you can expect to see:

- RFID (radio frequency identification) Lab Idea for Walsh College, by John Schefka
- Policy Manual for MCWIT by Cindy Wells
- Plus, projects by these students:
  - Nicole Doak
  - Sarah English
  - Deborah Golota
  - Josip Golub
  - Neil Gravenstreter

  - Lori Miller
  - Endrit Pasho
  - Edward Portillo
  - Timothy Wright

Who Attends this Capstone Fair?
Typically, the Capstone Fair is attended by students’ friends and family (and occasionally their employers, if their project is work-related), in addition to Walsh College officers, faculty, and staff. This event is open to the public, and recruiters have attended the event in the past as well.

Why Should I Attend?
The Capstone Fair is one example of what Walsh College is all about – demonstration of a student’s education. It provides you the opportunity to speak with several students about their project, many of which are being presented to their employers. You will have the opportunity to walk around the room and see each individual project, as well as hear from the students firsthand.
