APA Style: Book Authors/Editors

- Invert the names of all authors and give only the initials of the first name and middle name.

- Give the surnames of up to 7 authors. If there are eight authors or more, include the first 6 authors’ names, then insert three ellipses, and add the last author’s name. Example:

- Use commas to separate authors, to separate surnames and initials, and to separate initials, and suffixes (Jr. and III)

- Use an ampersand (&) before the last author.

- If an author is listed with the word with, include him/her in the reference in parentheses: Salton, G. L. (with Eisen, A. S.). Text citations will include only the primary author.

- Names of editors are treated like authors except that the abbreviations Ed. or Eds. are enclosed in parentheses after the last editor’s name.

- Spell out the full name of a group author: for example: Organisation for Economic Co-Operation and Development instead of the acronym OECD.

EXAMPLES:

One Author:

Two Authors:

Six Authors:

[Note: In APA style, you list the surnames of up to 7 authors in the reference list.]

Junior in Name:

One Editor:

Two Editors:

Author Listed with the Word With:

Association is the Author and Publisher:

*If the author and publisher are the same, type Author after the place of publication.*
