

TROY Walsh graduate makes Apple app

Walsh College Master of Science in Information Systems graduate, and Commerce Township resident, Tom Pletzke, is one of the latest app architects for Apple. Pletzke developed the app as part of his capstone course at Walsh. The app for his local band, the Lost City Band, was accepted by Apple on the first submission and is now available through the app store. The app provides several pages of data about the band and its members, including news, biographies, as well as past and upcoming events. For more information, visit www.walshcollege.edu.
